Support Available

Why clients choose MIB:

- Experienced professional team
- Customized AI-based solutions
- End-to-end technology support
- 100% security focus
- Innovative, future-ready approach
- Dedicated client support, 24/7

2. Our Engagement Process

Every MIB engagement — regardless of service — follows the same five-stage delivery process. This is the basic usage/workflow information applicable across all services below.

01. Discovery — Deep dive into the client's business requirements, goals, and challenges to fully understand their needs.

02. Strategy — Design a tailored solution strategy with clear milestones, timelines, and success metrics.

03. Development — Build the solution using modern technologies, with continuous testing and quality assurance.

04. Deployment / Launch — Launch the solution seamlessly, with comprehensive training and documentation handed to the client's team.

05. Optimization — Monitor performance, gather feedback, and continuously improve the solution for long-term success.

Typical timelines (per published FAQ): MVPs are typically delivered in 4–8 weeks; complete/full solutions in 8–16 weeks. Exact timelines are confirmed for each client during the Discovery phase.

3. Service Catalog

MIB offers ten core service lines. Each is delivered through the five-stage process above.

Artificial Intelligence Solutions

Custom AI solutions that drive innovation, automate decision-making, and unlock new possibilities for growth.

Key features:

- Custom AI model development
- Natural language processing
- Computer vision integration
- Predictive analytics

Business Process Automation

Streamlines operations and eliminates manual work with intelligent automation — optimizing workflows, reducing errors, and freeing teams for high-value tasks.

Key features:

- Robotic Process Automation (RPA)
- Workflow orchestration
- Document automation
- Process optimization

CRM & ERP Solutions

Centralizes business operations with custom CRM and ERP systems that integrate seamlessly with existing tools and processes.

Key features:

- Custom CRM development
- ERP implementation
- Integration with existing systems
- Real-time analytics dashboards

Machine Learning Integration

Implements machine learning models that learn and improve over time, turning data into actionable insight.

Key features:

- ML model deployment
- Data pipeline construction
- Model training & optimization
- A/B testing frameworks

Website & Mobile App Development

Builds responsive, high-performance digital experiences that engage users and drive conversions.

Key features:

- Responsive web design
- iOS & Android development
- Progressive Web Apps
- E-commerce solutions

Digital Marketing & Brand Growth

Data-driven marketing strategies that amplify online presence and build lasting brand relationships.

Key features:

- SEO optimization
- Social media marketing
- Content strategy
- Performance analytics

AI Chatbot Development

AI-powered chatbots that deliver 24/7 customer support, handle inquiries, qualify leads, and provide instant assistance — including WhatsApp automation for customer interactions.

Key features:

- NLP-based chatbots
- Multi-language support
- Integration with WhatsApp
- Custom conversation flows

Workflow Automation

Designs and automates complex business workflows to ensure consistency, compliance, and efficiency across operations.

Key features:

- Visual workflow designer
- Rule-based automation
- Approval routing
- Audit trails

Data Management & Analytics

Organizes, analyzes, and visualizes raw data to support strategic, informed business decisions.

Key features:

- Data warehousing
- Business intelligence
- Real-time dashboards
- Data visualization

Corporate IT Support & Consulting

Comprehensive IT support and strategic consulting to help clients navigate technology challenges and plan for future growth.

Key features:

- 24/7 IT support
- Technology roadmap
- Security assessments
- Cloud migration consulting

4. Technology Stack

MIB builds on modern, industry-standard technologies, including: React, Node.js, Python, TensorFlow, AWS, Docker, PostgreSQL, MongoDB, Kubernetes, TypeScript, Next.js, and GraphQL, among others. The team has extensive experience integrating with legacy systems, third-party APIs, and existing client software stacks.

5. Illustrative Case Studies (Service-Specific Documentation)

Published examples of how specific services have been delivered for clients:

AI-Powered Customer Service Bot (related service: AI Chatbot Development)

An intelligent chatbot that handles 80% of customer queries automatically.

Results: 24/7 availability · 80% query resolution

Enterprise CRM System (related service: CRM & ERP Solutions)

Custom CRM solution for managing leads, sales, and customer relationships.

Results: 500+ users · 2x sales pipeline

WhatsApp Marketing Automation (related service: AI Chatbot Development / Digital Marketing)

Automated WhatsApp campaigns that drive higher engagement.

Results: 40% higher engagement · 50k+ messages sent

6. Getting Started

New engagements begin with a free 30-minute consultation to discuss project requirements. MIB offers flexible pricing models — fixed-price projects, time & materials, or dedicated team arrangements — selected together with the client based on project fit.
